

Due Date: 06-17-2019 (M), BEFORE the class begins

This assignment covers textbook Chapter 6 and Chapter 1~5.

done **1. Heaps** (15 points)

Given the set of integers: {88, 2, 9, 36}, how many different MIN HEAPs can be made using these integers? Justify your answer.

2. Heap property (15 points)

Textbook Exercise 6.2-6 (p156)

done **3. Heap and Heap property** (15 points)

Provide a tight bound for the running time of finding the biggest element in a binary min-heap with n elements? Justify your answer.

done **4. Heap Sort** (15 points)

Using Figure 6.4 as a model, illustrate the operation of HEAPSORT on the array $A = \langle 5, 12, 1, 55, 8, 17, 22, 9, 4 \rangle$

done **5. Priority Queue** (40 points)

Textbook Exercise 6.5-8 (P 166). Provide (1) pseudocode, (2) correctness justification, and (3) provide an upper bound of your procedure and give an explanation.

Must be attached to each submission

Academic achievement is ordinarily evaluated on the basis of work that a student produces independently. Infringement of this Code of Honor entails penalties ranging from reprimand to suspension, dismissal or expulsion from the University.

Your name on any exercise is regarded as assurance and certification that what you are submitting for that exercise is the result of your own thoughts and study. Where collaboration is authorized, you should state very clearly which parts of any assignment were performed with collaboration and name your collaborators.

In writing examinations and quizzes, you are expected and required to respond entirely on the basis of your own memory and capacity, without any assistance whatsoever except such as what is specifically authorized by the instructor.

I certify that the work submitted with this assignment is mine and was generated in a manner consistent with this document, the course academic policy on the course website on Blackboard, and the UMass Lowell academic code.
