

QUERYPLAN EXCEPTION

```
1  package query;
2
3  public class QueryPlanException extends Exception {
4      private String message;
5
6      public QueryPlanException(String message) {
7          this.message = message;
8      }
9
10     public QueryPlanException(Exception e) {
11         this.message = e.getClass().toString() + ": " + e.getMessage();
12     }
13
14     @Override
15     public String getMessage() {
16         return this.message;
17     }
18 }
19
20
```
