Fall 2018

Quiz 3

11/1/18

Name: Dang Nhi Ngo
Student ID: 01553277

Using the beer database in the slides, answer the following query in SQL: *find the name and price of the beers sold at the bar if the bar charges the minimum average price of beers.*

```
select beer, price
from sells
where bar in (select bar from sells
              group by bar
              having avg(price)
              <= ALL (select
              avg(price) from sells
              group by bar));
```
