COMP 3050-201 Computer Architecture
Assignment Submission Details
Spring 2019

• **All** of your submissions must include a minimum of **four** separate files:

- **File 1:** A short **write-up** that **first** specifies what you think your **degree of success** with a project is (**from 0% to 100%**), followed by a brief discussion of your approach to the project along with a **detailed description** of any problems that you were **not** able to resolve for this project. **Failure to specifically provide this information will result in a 0 grade** on your assignment. If you do **not disclose** problems in your write-up and problems are detected when your program is tested, you will receive a grade of 0. **Make sure that you include your email address in your write-up so that the corrector can email you your grade.**

- **File(s) 2(a, b, c, …)**: Your **complete source code**, in one or more **.c** and/or **.h** files

- **File 3**: A **make file** to build your assignment. This file must be named **Makefile**.

- **File 4:** A file that includes your **resulting output** run(s) from your project. This is a simple text file that shows your output, but make sure that you annotate it so that it is self-descriptive and that all detailed output is well identified.

• The submit syntax issued from a shell prompt for your first assignment is:
submit lleung hw1 <your_directory>

where **<your_directory>** is the name of the directory with exactly your required submission files in it. The directory name must include your name, your student ID and will vary from: **lastname_firstname_SID_hw1, lastname_firstname_SID_hw2 ... lastname_firstname_SID_hw7.** For each succeeding assignment, substitute hw2, hw3, etc. for hw1.

Lok Sum Leung (LokSum_Leung@student.uml.edu) is the Grader for this section of the course. She will be correcting the assignments **only** as submitted to the submission queue, so please submit as specified above. She will email you your grade and any details about points you may have lost on each assignment. **It is very important to make sure that you include your email address in the write-up portion of your submission, so she can return your grade to you.**

- Assignments are **graded** from **0 – 10 in half point (0.5) increments**, and, as outlined in the class syllabus, will **lose 2 points for each week they are late (the first point for up to three days late, and the second point after that in a given week). The most a late submission will be accepted is two weeks late (less than that for the last two). The 11:59 deadlines are strict. The submission queues shut down.**

- Lok Sum will have weekly office hours on Tuesdays and Thursdays from 2 to 3 p.m. in the CS lab (Dandeneau 417). You can also contact her by email if you have questions regarding course details and assignment grades. I will be available after class on Monday nights.
